

Think Data, Think Artha.

CASE STUDY

Managed Services

Boosting Operational Efficiency with Managed Services for Healthcare

A leading healthcare organization struggled with IT operations, data reconciliation, claims processing, and compliance risks. High ticket volumes and manual inefficiencies impacted performance. Partnering with Artha Solutions for Managed Services, they streamlined processes, reduced operational overhead, and enhanced service delivery, ensuring efficiency, compliance, and improved system performance.

Outcomes

70%

Member satisfaction up 70% through timely services, rewards and improved wellness programs experiences.

3%

Reduced rejection rate below 3% by enhancing data quality checks and cleanup for MassHealth submissions.

35%

Achieved 35% reduction in manual workload as automated workflows minimized manual interventions.

31%

Achieved 31% ticket backlog reduction by optimizing IT service management and incident resolution.

20%

Increase in operational efficiency by enhancing system performance and streamlining support services.

40%

Faster claims processing by reducing turnaround times for claims submissions and reimbursements.

Challenges

High Ticket Volumes & Inefficient Processes

Handling thousands of tickets across multiple systems caused delays and backlog accumulation, while lack of automation increased manual effort and reduced efficiency.

Claims Processing & Data Reconciliation Issues

Errors in claims submissions and response files caused delayed reimbursements and financial inefficiencies, while data discrepancies across systems hindered accurate reconciliation.

Compliance & Regulatory Challenges

Ensuring CMS and MassHealth compliance required manual interventions and audits, while inconsistent data governance practices heightened compliance risks.

Limited System Performance & Resource Utilization

Legacy systems and large outdated datasets slowed performance, claims processing, and reporting, while IT resources were overburdened with manual maintenance tasks.

Solutions Provided

IT Service Management & Process Automation

Implemented automated workflows to reduce manual ticket handling, improving service request resolution and decreasing ticket backlog by 31% for faster responses.

Data Reconciliation & Compliance Enhancement

Integrated automated data reconciliation tools to enhance accuracy and reduce inconsistencies, while improving audit tracking and ensuring CMS and MassHealth compliance.

Claims Processing Optimization

Automated claims data validation and submission workflows, reducing errors and accelerating reimbursements, while ensuring timely and accurate claims reporting for compliance.

System Performance & Infrastructure Optimization

Upgraded and migrated outdated datasets to enhance system speed and efficiency, while optimizing databases and implementing proactive monitoring to prevent issues.
