

Explanation of Payments (EOP) Implementation for a Health Insurance Provider

Artha Solutions partnered with a health insurance provider to streamline their Explanation of Payments (EOP) process and enhance customer satisfaction. By addressing key challenges in EOP generation and delivery, Artha Solutions improved operational efficiency, reduced customer inquiries, and ensured regulatory compliance.

Outcomes

60%

Automation and streamlined workflows reduced the time required to generate EOPs by 60%.

35%

Improved EOP clarity and transparency led to a 35% decrease in customer inquiries related to EOPs.

99.99%

Centralized data management and automated processes ensured a 99.99% EOP accuracy rate.

90%

The built-in compliance checks and standardized framework resulted in a 90% improvement in compliance adherence.

Challenges

The insurance provider faced several challenges in its EOP process

Data Silos and Inconsistencies

Data was scattered across multiple systems, leading to inconsistencies and inaccuracies in EOPs.

Lack of Transparency

Policyholders often found it difficult to understand their EOPs, leading to numerous inquiries and dissatisfaction.

Manual Processing

The EOP generation process involved significant manual effort, resulting in delays and errors.

Compliance Risks

Ensuring compliance with EOP regulations was challenging due to the complexity of the process and the lack of a standardized framework.

Solutions Provided

Artha Solutions used Talend to implement a comprehensive solution to address these challenges

Centralized Data Management

Artha Solutions established a centralized data repository to consolidate data from various sources, ensuring accuracy and consistency.

Automated EOP Generation

Leveraged The EOP generation process was automated using a 2-step metadata framework, reducing manual effort and errors.

Enhanced EOP Clarity

EOPs were redesigned to provide clear and concise information, improving policyholder understanding and reducing inquiries.

Compliance Assurance

The solution incorporated built-in compliance checks to ensure adherence to EOP regulations.
