

Enhancing Customer 360 with MDM: A Leading Cosmetics Brand's Transformation

A leading American cosmetics company, operating globally, partnered with Artha Solutions to implement a Customer 360 solution using MDM. Aiming to unify fragmented consumer data and improve accuracy, the company established a single, trusted view of customers. This enabled data-driven decision-making and personalized experiences across all channels.

Outcomes

110 Million

Consolidated 110M consumer records, eliminating data silos and improving customer engagement.

30%

Improved cross-selling opportunities due to optimized product recommendations.

125 TPS

Achieved 125 TPS, surpassing the minimum target of 100 TPS for real-time data updates.

Across 3 Regions

Successfully deployed across 3 regions: APAC, EMEA, and North America.

25%

Higher customer retention due to enhanced personalized marketing campaigns.

Challenges

The company faced significant hurdles in building a comprehensive Customer 360 platform, including:

Fragmented Consumer Data

Managing **100M+ consumer records** from various sources, including e-commerce platforms, retail transactions, loyalty programs, and social media.

Duplicate and Inconsistent Records

Implementing advanced matching and deduplication to unify consumer profiles across different touchpoints.

Data Processing Performance

Ensuring real-time and batch data ingestion with a minimum processing rate of **100 Transactions Per Second (TPS)**.

Scalability and Global Reach

Deploying a centralized MDM solution across **APAC, EMEA, and North America** while ensuring compliance with regional regulations.

Solutions Provided

Cloud Infrastructure

Leveraged Microsoft Azure with MySQL InnoDB clusters for high availability and scalability.

Real-Time Data Flow

Implemented Apache Kafka for seamless data streaming, batch processing, and alerts.

Optimized Data Integration

Deployed Talend with multi-threading and custom jobs for JSON outputs aligned to business rules.
