

Think Data, Think Artha.

CASE STUDY

ETL Framework & Data Governance

Enhancing Financial Transparency with Strategic Data Transformation

A leading insurance provider in Southeast Asia embarked on an IFRS 17 compliance initiative, facing challenges in data transformation, integration, and regulatory reporting. The company partnered with Artha Solutions to implement a metadata-driven ETL framework, ensuring seamless data standardization, improved transparency, and operational efficiency.

Outcomes

99.7%

Achieved 99.7% data accuracy by improving validation, transformation, and compliance monitoring.

45%

Automated workflows cut manual efforts by 45%, speeding up reporting and compliance.

30%

Retiring legacy systems cut costs by 30%, enhancing operational and financial efficiency.

120+

Deployed 120+ ETL flows, ensuring error-free data integration within a short timeframe.

Challenges

Complex Data Transformation & Integration

Integrating nine disparate systems (Life Asia, PAS, Prophet) for IFRS 17 compliance was challenging due to legacy data inconsistencies, risking financial reporting accuracy.

ETL Process Development & Performance Optimization

Developed and tested ETL processes to integrate structured and unstructured data, ensuring error-free, real-time transfers for timely financial reporting and analysis.

Regulatory Compliance & Data Governance

Aligning financial data with IFRS 17 required comprehensive restructuring and secure, automated sFTP transfers to ensure workflow precision and compliance.

Solutions Provided

Scalable, Metadata-Driven Data Framework

Designed a reusable ETL framework for data standardization and integration, ensuring compatibility with Delimited, Excel, and database formats across multiple systems.

Independent Data Workflows & Automation

Developed flexible ETL workflows for dynamic data handling, integrating automated validation and anomaly detection to minimize manual intervention in financial reporting.

Advanced Logging & Auditing for Compliance

Implemented real-time error tracking, notifications, and audit trails, ensuring secure file transfers for seamless data movement and compliance reporting.

Streamlined Collaboration & IFRS 17 Alignment

Collaborated with PwC, GT, and internal teams for timely execution and compliance, developing custom workflows to enhance data accuracy and IFRS 17 reporting.
