

Ensuring Call Integrity & Compliance with Advanced Call Labeling Solutions

A leading provider of call authentication and fraud prevention solutions faced challenges in ensuring accurate call labeling, complying with call blocking regulations, and improving business-to-customer communication. The company partnered with Artha Solutions to develop a robust call integrity platform, leveraging advanced data integration, real-time monitoring, and AI-driven insights to enhance call authentication and regulatory compliance.

Outcomes

99.8%

Accuracy ensured proper registration, eliminating misclassification.

50%

Reduced call blocking minimized wrongful incidents, improving customer engagement.

35%

35% faster monitoring automated tracking, enhancing compliance and reducing manual efforts.

40%

Increased visibility strengthened real-time call authentication insights.

20%

Improved trust optimized call labeling, increasing answer rates.

Challenges

Platform & Data Integration Development

Lacking a centralized integration layer, real-time data exchange across telecom carriers, analytics firms, and businesses was hindered, while challenges arose in scaling data management to meet industry regulations.

Compliance with Call Blocking & Labeling Regulations

A platform was needed to help businesses comply with evolving call authentication rules and leverage cognitive insights to improve call validation and labeling accuracy.

Ensuring Call Accuracy & Reducing Mislabeling

Businesses struggled with calls being incorrectly labeled as "Scam" or "Fraud," impacting customer trust and engagement, necessitating concrete actions to prevent wrongful call blocking and improve call authenticity visibility.

Solutions Provided

Comprehensive Phone Number Registration & Monitoring

By developing a call registry system and ensuring accurate number labeling, Artha helped reduce default blocking at the carrier level through registration with telecom carriers, analytics firms, and call blocking programs.

Stakeholder Collaboration for Call Labeling Optimization

By working with telecom carriers, analytics providers, and call-blocking application developers and integrating AI-driven insights, Artha ensured accurate call representation and prevented false positives.

Advanced Data Integration & Fraud Prevention

By developing a centralized data integration layer and enabling AI-driven call authentication, Artha helped streamline call tracking and fraud prevention workflows while improving call reputation monitoring and regulatory compliance.

Real-Time Label Health Checks & Compliance Auditing

By implementing monthly health checks to monitor number labeling accuracy and providing automated compliance tracking, Artha ensured continuous adherence to call authentication regulations and helped detect potential misclassifications.
