

Optimizing Retail Banking with Data Quality Automation: A Success Story

A leading retail bank struggled with inconsistent metadata, poor data governance, and quality issues. Partnering with Artha Solutions, it implemented Talend's platform, leveraging data quality automation to enhance governance, improve customer experience, and ensure regulatory compliance.

Outcomes

40%

Increased data accuracy by 40%, reducing customer profile errors and inconsistencies.

95%

Eliminated 95% of duplicate records, ensuring a single source of truth across all banking systems.

30%

Enabled 30% more personalized banking offers, improving customer response rates.

85%

Automated 85% of data cleansing and validation tasks, minimizing human intervention and errors.

25%

Customer satisfaction increased 25% through personalized and seamless banking interactions.

Challenges

Inconsistent Metadata

Data definitions varied across systems, leading to challenges in accurate data analysis and reporting.

Lack of Data Governance

Absence of a robust governance framework resulted in inconsistent data quality and limited data control.

Poor Data Quality

Inaccurate and incomplete data compromised customer insights, reporting, and the ability to offer personalized services.

Solutions Provided

Artha chose Talend as the data management solution to address the challenges of the bank. The solution involved:

Data Integration

Ensured seamless data flow across systems for consistent and complete information.

Data Governance

Established data standards, policies, and controls for improved data quality and security.

Data Quality Automation

Employed automated tools for data cleansing, validation, and enrichment to ensure accurate customer data.
